Contents

No. 1 (February 1989)

PAGE

Effect of different oxygen concentrations in the gas phase on biochemical activities of goat mammary tissue in organ culture. J. Škarda and E. Urbanová 1

Metabolic adaptations in goat mammary tissue during long-term incomplete milking. C. J. Wilde, D. R. Blatchford, C. H. Knight and M. Peaker 7

Increased secretion of insulin-like growth factor I into milk of cows treated with recombinantly derived bovine growth hormone. C. G. Prosser, I. R. Fleet and A. N. Corps 17

Cardiovascular responses and mammary substrate uptake in Jersey cows treated with pituitary-derived growth hormone during late lactation. F. M. Fullerton, I. R. Fleet, R. B. Heap, I. C. Hart and T. B. Mepham 27

Lack of correlation between milk glucose concentrations and rates of milk production in the rat. M. R. Grigor, J. M. Carrington, P. G. Arthur and P. E. Hartmann 37

Effect of hydraulic milking on milking performance, teat condition and lipolysis. R. J. Grindal and T. K. Griffin 45

Effect of a shielded liner on new mastitis infection. M. Binde, H. P. Melby, A. Ask, A. Lund and S. AA. Vangdal 55

Subunit components of casein micelles from bovine, ovine, caprine and equine milks. T. Ono, H. Kohno, S. Odagiri and T. Takagi 61

Precision conductometry in milk renneting. P. Dejmek 69

A mathematical model for the description of chymosin action on casein micelles. U. Merin, H. Talpaz and S. Fishman 79

Solubilization of spray-dried lactalbumin by Alcalase. C. G. Smith, P. A. Munro, D. E. Otter and R. M. Brauer 87

Whipping properties of cream in relation to milk composition. W. Banks, J. L. Clapperton, D. D. Muir and A. K. Girdler 97

Uptake of glutamic acid by *Streptococcus salivarius* subsp. *thermophilus* CNRZ 302. P. Bracquart, J.-Y. Le Deaut and G. Linden 107

Purification and thermostability of β-galactosidase (lactase) from an autolytic strain of *Streptoccus salivarius* subsp. *thermophilus*. B.-S. Chang and R. R. Mahoney 117

Anaerobic digestion of deproteinated cheese whey in an Upflow Sludge Blanket reactor. E. W. Schröder and J. de Haast 129

Proteolysis of Cabrales cheese and other European blue vein cheese varieties. J. Fernandez-Salguero, A. Marcos, M. Alcala and M. A. Esteban . 141

Ultrafiltration of reconstituted skim milk. M. H. Abd El-Salam and N. Shahein 147

Proportion of phage-insensitive and phage-sensitive cells within pure strains of lactic streptococci, and the influence of calcium. J. Tesfaigzi and R. Süssmuth 151

Effect of antibiotic resistance on the flavour profile of lactic acid bacteria. K. S. Babu, R. S. Singh and H. Chander 155

No. 2 (May 1989)

Dr M. Elisabeth Sharpe 159

Release of cholesteryl esters by the mammary gland of the pre-partum cow. G. E. Thompson 161

Catecholamines, oxytocin and milk removal in dairy cows. J. W. Blum, D. Schams and R. Bruckmaier 167

Changes in the concentration of metabolites in milk from cows fed on diets supplemented with soyabean oil or fatty acids. A. Faulkner and H. T. Pollock 179

Observations on the heat-induced salt balance changes in milk. I. Effect of heating time between 4 and 90 °C. Y. Pouliot, M. Boulet and P. Paquin 185

Observations on the heat-induced salt balance changes in milk. II. Reversibility on cooling. Y. Pouliot, M. Boulet and P. Paquin . . 193

A model heat-exchange apparatus for the investigation of fouling of stainless steel surfaces by milk. I. Deposit formation at 100 °C. C. L. Foster, M. Britten and M. L. Green 201

Low resolution NMR spectroscopy: a tool to study protein denaturation. I. Application to diamagnetic whey proteins. P. Lambelet, R. Berrocal and F. Ducret 211

Estimation of casein micelles' surface energy by means of contact angle measurements. M. Britten, M. Boulet and P. Paquin . . . 223

Binding of zinc to bovine and human milk proteins. H. Singh, A. Flynn and P. F. Fox 235

Zinc binding in bovine milk. H. Singh, A. Flynn and P. F. Fox . . . 249

Fractional melting of hydrogenated milk fat. W. Banks, J. L. Clapperton and A. K. Girdler 265

Compression and impact strength of gels, prepared from fractionated whey proteins, in relation to composition and microstructure. K. R. LANGLEY and M. L. GREEN 275

Accelerated ripening of Feta cheese, with heat-shocked cultures or microbial proteinases. A. VAFOPOULOU, E. ALICHANIDIS and G. ZERFIRIDIS . . 285

Effects of β-lactoglobulin and κ-casein genetic variants and concentrations on syneresis of gels from renneted heated milk. D. M. MCLEAN and J. SCHAAR 297

Review article. Ewes' milk cheese: technology, microbiology and chemistry. M. NUÑEZ, M. MEDINA and P. GAYA 303

No. 3 (Special Issue, 1989)

Preface ii

Action of plasmin on bovine β-casein in a membrane reactor. S. VISSER, H. J. NOORMAN, C. J. SLANGEN and H. S. ROLLEMA 323

Tryptic phosphopeptides from whole casein. II. Physicochemical properties related to the solubilization of calcium. R. BERROCAL, S. CHANTON, M. A. JUILLERAT, B. PAVILLARD, J.-C. SCHERZ and R. JOST 335

Chemical characterization of bioactive peptides from *in vivo* digests of casein. H. MEISEL and H. FRISTER 343

Biologically active peptides of casein and lactotransferrin implicated in platelet function. A.-M. FIAT, S. LEVY-TOLEDANO, J. P. CAEN and P. JOLLÈS 351

Biologically active casein peptides implicated in immunomodulation. D. MIGLIORE-SAMOUR, F. FLOC'H and P. JOLLÈS 357

Opioid antagonist peptides derived from κ-casein. H. CHIBA, F. TANI and M. YOSHIKAWA 363

Isolation and partial purification of astringent compounds from ultra-high temperature sterilized milk. V. R. HARWALKAR, B. BOUTIN-MUMA, H. CHOLETTE, R. C. MCKELLAR, D. B. EMMONS and G. KLASSEN . . 367

The level of bitterness and solubility of hydrolysates produced by controlled proteolysis of casein. G. E. VEGARUD and T. LANGSRUD . . . 375

Enzymic dephosphorylation of bovine casein to improve acid clotting properties and digestibility for infant formula. E. LI-CHAN and S. NAKAI 381

Rapid separation of bovine caseins by mass ion exchange chromatography. K. F. NG-KWAI-HANG and J. P. PÉLISSIER 391

Phosphorylation of casein components by Tyrosine-specific protein kinases. M. YOSHIKAWA, M. SHIMADA, T. MIYAMURA, T. TAKEYA and H. CHIBA . 399

Study of calcium binding to phosphoserine residues of β-casein and its phosphopeptide (1–25) by ^{31}P NMR. J.-J. BAUMY, P. GUENOT, S. SINBANDHIT and G. BRULÉ 403

Composition and structure of micellar calcium phosphate. C. Holt, M. J. J. M. van Kemenade, L. S. Nelson Jr., L. Sawyer, J. E. Harries, R. T. Bailey and D. W. L. Hukins 411

A ^{1}H-NMR study of bovine casein micelles; influence of pH, temperature and calcium ions on micellar structure. H. S. Rollema and J. A. Brinkhuis 417

Hydrophobic interactions in human casein micelle formation: β-casein aggregation. C. W. Slattery, S. M. Sood and P. Chang . . . 427

Dissociation and reassociation of enzyme-treated caseins under high pressure. K. Ohmiya, T. Kajino, S. Shimizu and K. Gekko 435

Small-angle X-ray scattering investigation of the micellar and submicellar forms of bovine casein. H. Pessen, T. F. Kumosinski and H. M. Farrell, Jr 443

A model for the assembly of bovine casein micelles from F2 and F3 subunits. T. Ono and T. Obata 453

The structure of casein micelles between pH 5·5 and 6·7 as determined by light-scattering, electron microscopy and voluminosity experiments. H. J. Vreeman, B. W. van Markwijk and P. Both 463

Surface and emulsifying properties of caseins. E. Dickinson . . . 471

Influence of glycosylation on the hydration properties of caseinates. M. Le Meste, B. Colas, G. Blond and D. Simatos 479

Surface active properties at the air–water interface of β-casein and its fragments derived by plasmin proteolysis. M. Wilson, D. M. Mulvihill, W. J. Donnelly and B. P. Gill 487

Surface properties of the bovine casein components: relationships between structure and foaming properties. D. Lorient, B. Closs and J. L. Courthaudon 495

Heat-induced changes in sodium caseinate. M. Guo, P. F. Fox, A. Flynn and K. S. Mahammad 503

Experiments on the heat-induced salt balance changes in cow's milk. Y. Pouliot, M. Boulet and P. Paquin 513

Milk stability in ethanolic solutions. A. Pierre 521

Rheological properties of casein gels. T. van Vliet, S. P. F. M. Roefs, P. Zoon and P. Walstra 529

Application of fractal concepts to the study of caseinate aggregation phenomena. D. S. Horne 535

Poster Presentations 543

List of participants 557

No. 4 (August 1989)

Effect of amount and composition of feed given over three lactations on the performance of the dairy cow. W. H. Broster, A. J. Clements, V. J. Broster, T. Smith, J. W. Siviter and R. E. Hill 561

Automatic application of teat disinfectant through the milking machine cluster. R. J. Grindal and D. J. Priest 579

Short-term effects of frequent milking of dairy cows. R. van der Iest and J. E. Hillerton 587

Laboratory simulations of a commercial UHT treatment using an oil bath and a programmable, electronically temperature-controlled oven. R. E. O'Connor and C. O'Connor 593

Tryptic phosphopeptides from whole casein. I. Preparation and analysis by fast protein liquid chromatography. M. A. Juillerat, R. Baechler, R. Berrocal, S. Chanton, J.-C. Scherz and R. Jost 603

Incorporation of individual casein constituents into casein aggregates cross-linked by colloidal calcium phosphate in artificial casein micelles. T. Aoki 613

A method for determination of γ-casein and its use for investigating proteolysis in bovine milk. Y. Igarashi 619

Determination of chymosin and bovine pepsin A activity in combined rennets on the basis of immunochemical inhibition. E. Beránková, P. Rauch and J. Káš 631

Characteristics of the autolysis of variants of *Lactococcus lactis* subsp. *cremoris*. K. Niskasaari 639

Monitoring of B-complex vitamins in yogurt during fermentation. W. Kneifel, S. Holub and M. Wirthmann 651

Comparison of Cheddar cheese made with a recombinant calf chymosin and with standard calf rennet. V. E. Bines, P. Young and B. A. Law . 657

Chemical prediction of water activity in processed cheese. M. A. Esteban and A. Marcos 665

Phosphopeptide dissociation from micellar calcium phosphate preparations does not induce crystallinity. L. S. Nelson Jr, C. Holt and D. W. L. Hukins 669

No. 5 (November 1989)

Feeding calcium soaps of fatty acids to lactating cows: effect on production, body condition and blood lipids. D. Sklan, E. Bogin, Y. Avidar and S. Gur-Arie 675

Effect of udder preparation on transmission of *Staphylococcus aureus* while milking with a multi-valved cluster. R. J. Grindal and A. J. Bramley 683

Development of a cows' milk identification test (COMIT) for field use. T. García, R. Martín, E. Rodríguez, P. E. Hernández and B. Sanz . 691

Lipase redistribution in cows' milk during induced lipolysis. I. Activation by agitation, temperature change, blood serum and heparin. P. Cartier and Y. Chilliard 699

Lipase redistribution in cows' milk during induced lipolysis. II. Activation by milk pH adjustment. P. Cartier, Y. Chilliard and J. Bout . . 711

Changes in milk plasminogen, plasmin and *in vitro* bacterial growth in whey during early lactation. L. Kaartinen and S. Pyörälä 719

pH-Induced dissociation of bovine casein micelles. II. Mineral solubilization and its relation to casein release. D. G. Dalgleish and A. J. R. Law . 727

Formation of galactose during heat treatment of milk and model systems. M. M. Calvo and A. Olano 737

Ultraviolet spectroscopic studies on the feathering of cream in instant coffee. L. Hamboyan, D. A. Pink, D. Klapstein, L. MacDonald and H. Aboud 741

Theoretical analysis of ultraviolet spectroscopic studies on the feathering of cream in coffee. D. A. Pink, L. Hamboyan and H. Aboud . . . 749

Automatic method to quantify starter activity based on pH measurement. H. E. Spinnler and G. Corrieu 755

Intracellular proteinase of *Lactococcus lactis* subsp. *lactis* NCDO 763. G. Muset, V. Monnet and J.-C. Gripon 765

Serological identification of *Streptococcus salivarius* subsp. *thermophilus*. M. A. Nour, G. Abdel-Tawab, S. Shalaby and O. A. Mohamed . . . 779

Factors affecting the thermostability of β-galactosidase (*Streptococcus salivarius* subsp. *thermophilus*) in milk: a quantitative study. B.-S. Chang and R. R. Mahoney 785

Sandwich enzyme immunoassay of *Mucor miehei* proteinase (Fromase) in cheese. P. Rauch, I. Hochel, E. Beránková and J. Káš . . . 793

Production of methanethiol in milk fat-coated microcapsules containing *Brevibacterium linens* and methionine. S. C. Kim and N. F. Olson . 799

Amino acid composition of yeast single cell protein grown on paneer whey. K. Singh and S. Neelakantan 813

Specificity of plasmin towards bovine α_{s2}-casein. D. Le Bars and J.-C. Gripon 817

Proteolysis in cheese investigated by high performance liquid chromatography. T. M. I. E. Christensen, K. R. Kristiansen and J. S. Madsen 823
